### **Profile**

A Senior Strategic Architect with the SAS Institute in the US Energy Practice, Joe Indelicato is skilled in predictive analytics and data mining, specializing in intelligent systems and machine learning. New to SAS, Joe brings with him experience as a former Manager of Research and Development at a company in the high tech industry, former Lead of Advanced Analytics at a company in the oil and gas industry. Prior to those roles, he conceptualized and led the development of predictive analytics for play calling and player evaluations for a NFL football team. He has also spoken on the capabilities of predictive analytics and its impact on industry.

In total, Joe has over 15 years of experience as a data research analyst, data architect, predictive analytics engineer and software architect. Joe's background includes experience in many data-related technologies, including: RDBMS, OLAP/multidimensional databases, BI tools, predictive analytics and statistical analysis. He is a graduate of the University of Houston's school of Computer Sciences.
